

never change a winning boat

The „BuK 2005“ model is the newest and advanced type of BuK dragon boats.

It combines traditional, proven features with modern hull design perfected for use as racing-boat as well as for fun sport.

The „BuK 2005“ model collects the manufacturing experiences of 500 GRP-dragon-boats built by BuK in the last years and has been made possible by adoption of many suggestions submitted by active and experienced dragon-boat paddlers.

The „BuK 2005“ model is produced by means of modern GRP-technology and provides the highest standard of quality and safety.
